

Subject: REFERENCE FOR BOCO PARDUBICE machines, s.r.o.

We have cooperated with BOCO PARDUBICE machines, s.r.o. for more than 10 years.

Our cooperation is both in the field of large projects, i.e. deliveries of machines or complete lines, and in the field of spare parts for machines for extrusion of silicone compounds of different hardness. These are mainly barrels and screws or extrusion heads, both new parts and refurbishments.

Regarding the delivery of machines, company BOCO participated in the following successfully implemented projects:

- 2013 - extruder EB 90 BOCOMATIC
- 2016 - delivery of a complete line consisting of:
 - extruder EB-S 75
 - horizontal vulcanization tunnel 10 m
 - cutting device
- 2016 - production of vertical vulcanization oven
- 2017 - extruder EB-S 75
- 2018-2019 - delivery of horizontal vulcanization tunnel 10 m with energy saving
- 2022 - reconstruction of vertical vulcanization oven

All the equipment delivered by BOCO work to our expectations, practically without any malfunctions. All agreed deadlines and requirements are professionally met by BOCO. If there is a problem, they are always ready to solve it in the shortest possible time.

We believe that we will continue to maintain and develop the mutually set values of cooperation and therefore we plan to implement further joint projects in the future.
